

Eligibility Restrictions for Refundable Tax Credits Would Harm Colorado's Economy

While the economy is improving, too many working families are not earning enough to cover their basic living expenses. In Colorado, approximately 170,000 Latinos live below the supplemental poverty threshold.¹ Among the most effective federal policies to fight poverty are the Child Tax Credit (CTC) and the Earned Income Tax Credit (EITC).

The GOP tax proposal threatens certain taxpaying immigrants' eligibility for refundable tax credits. Currently, taxpayers filing with an Individual Taxpayer Identification Number (ITIN) are eligible for the CTC, and a Social Security number is required to claim the EITC. The Republican plan would require a work-authorized Social Security number (SSN) to claim the EITC and it would require those filing with an ITIN and claiming the CTC to provide a SSN for each child. These proposed changes would impact millions of Latino families and their nearly four million U.S. citizen Latino children as well as DACA recipients who would no longer be eligible to claim the EITC once their status expires.²

The EITC and CTC promote work and produce lifelong benefits for low-income families.

- The EITC amounts to as much as \$6,143 and the CTC can be up to \$1,000 per child, depending on family income. These tax credits are refundable, meaning very low-income families can still earn a partial credit.
- Only people who are working can be eligible for the EITC and the CTC. Evidence shows that the EITC was a major factor in boosting single mothers' employment.
- Studies have linked tax credits like the CTC to higher test scores, particularly in math; higher high school graduation rates; and higher college attendance rates.³

The CTC is an effective anti-poverty program for Colorado's children.

- In tax year 2014, approximately 276,000 tax filers in Colorado received CTC benefits.⁴
- The CTC added approximately \$387 million into Colorado's economy in tax year 2014.⁵
- The latest Census data show that 44% of CTC beneficiaries in Colorado were Latino.⁶
- The CTC lifted an estimated 21,000 Colorado Latinos out of poverty in 2015.⁷

The EITC is vital to the financial security of Colorado's hard-working families.

- In tax year 2015, approximately 350,000 tax filers in Colorado received EITC benefits.⁸
- The EITC added approximately \$777 million into Colorado's economy in tax year 2014.⁹
- The latest Census data show that 29% of EITC beneficiaries in Colorado were Latino.¹⁰
- The EITC lifted approximately 38,000 Colorado Latinos out of poverty in 2015.¹¹

Eligibility restrictions for refundable tax credits would harm Colorado's U.S. citizen children and Dreamers.

- Requiring ITIN filers to provide a SSN for each child to be eligible for the CTC could affect up to 60,000 mixed-status families in Colorado.¹²
- Colorado's 19,000 DACA recipients would lose their eligibility for EITC once their status expires.¹³
