

As the data below show, Hispanics[†] are quickly becoming a population with a national presence. The most dramatic Latino population growth has occurred in "nontraditional" states, and Hispanics are now the largest minority in the country. Given that almost half of Hispanics are under 25 years old, they will constitute a large segment of the future U.S. population, workforce, and electorate.

California Compared to the Nation

- ▼ California is the state with the largest Latino population.¹
- ▼ Between 1990 and 2000, the growth rate of the Latino population in California ranked 43rd in the country.¹
- ▼ Of all states, California has the second-largest share of Latinos when compared to the total state population.¹

	Population (2003) ²		Hispanic Percent of Population ²	Growth Rate (1990-2000) ¹		Median Age (2003) ²	
	Total	Hispanic		Total	Hispanic	Total	Hispanic

California	34,650,690	11,980,884	34.6%	13.8%	42.6%	34.1 years	25.9 years

Economic Well-Being

- ▼ Latinos make a significant contribution to the labor force, representing an increasing share of workers and taxpayers, yet they are overwhelmingly vulnerable to economic downturns and experience high poverty rates, especially among working families with children.
