

As the data below show, Hispanics* are quickly becoming a population with a national presence. The most dramatic Latino population growth has occurred in "nontraditional" states, and Hispanics are now the largest minority in the country. Given that almost half of Hispanics are under 25 years old, they will constitute a large segment of the future U.S. population, workforce, and electorate.

Texas Compared to the Nation

- ▼ Texas is the state with the second-largest Latino population.¹
- ▼ Between 1990 and 2000, the growth rate of the Latino population in Texas ranked 36th in the country.¹
- ▼ Of all states, Texas has the third-largest share of Latinos when compared to the total state population.¹

	Population (2003) ²		Hispanic Percent of Population ²	Growth Rate (1990-2000) ¹		Median Age (2003) ²
