

As the data below show, Hispanics* are quickly becoming a population with a national presence. The most dramatic Latino population growth has occurred in "nontraditional" states, and Hispanics are now the largest minority in the country. Given that almost half of Hispanics are under 25 years old, they will constitute a large segment of the future U.S. population, workforce, and electorate.

Washington Compared to the Nation

- Washington is the state with the tenth-largest Latino population.¹
- Between 1990 and 2000, the growth rate of the Latino population in Washington ranked 20th in the country.¹
- Of all states, Washington has the 17th-largest share of Latinos when compared to the total state population.¹

Washington	5,990,020	478,824	8.0%	21.1%	105.8%	36.2 years	24.6 years

Economic Well-Being

- Latinos make a significant contribution to the labor force, representing an increasing share of workers and taxpayers, yet they are overwhelmingly vulnerable to economic downturns and experience high poverty rates, especially among working families with children.
