

STEP UP TO COLLEGE STEP INTO A CAREER

New York | Common Core

WHAT IS THE COMMON CORE?

The Common Core State Standards (CCSS) are a state-led effort to establish a single set of clear educational standards for English language arts and mathematics that states can share and voluntarily adopt. These standards are designed to ensure that students graduate from high school prepared for college, work, and success in the global economy.

WHY ARE STANDARDS NEEDED?

62%

of New York's Latino adults lack a postsecondary degree and do not qualify for 68% of estimated job openings

Standards, the backbone of the education system, tell us what children should know and be able to do in each grade and subject. Educators align materials, tests and teaching strategies to meet those standards. With defined standards, parents and caregivers can know how their children are doing and how best to help them at home. Standards also ensure that our children develop the skills they need at each grade level that will prepare them to pursue opportunities in college or the workforce.

HOW CAN WE HELP ENSURE COMMON CORE'S SUCCESS?

- **Accountability is essential.** We must be able to measure how schools are effectively delivering the Common Core State Standards and how well students are learning.
- **Parental engagement is critical.** We can ensure parents are successful partners in their children's learning by providing them with information and tools.
- **Resources are vital.** In providing the necessary resources for training and materials, we can support the successful implementation of standards and shift in classroom practice.
- **The business community must help.** By supporting clearer and higher standards, we are strengthening the education-to-workforce pipeline.

LATINO STUDENTS IN NEW YORK*

- New York has the **4th largest Hispanic population**
- Hispanics **composed 24% of all public school enrollments** in New York in 2012–2013
- English and math proficiency levels are low among Latino children. **Only 17% of fourth graders were proficient in reading** and **12% of eighth graders were proficient in math** in 2013
- English language learners (ELLs) make up 8% of New York's public schools and graduate at a rate of 44%. In 2013, **only 4% of fourth graders and 1% of eighth graders, respectively, were at or above proficiency levels in reading**
- New York's **4-year high school graduation rate among Latinos is at a low of 62%** compared to the state graduation rate of 77%
- In October 2012, Hispanics comprised **16% of all enrollments in degree granting institutions** which is a 1% increase from the previous year
- Latinos in the class of 2010-11 **graduated from college at a rate of 32%** compared to 52% of Whites
- In New York, there is a wide degree attainment gap between Latinos and other racial groups. **22% of Hispanic adults have an associate degree or higher** compared to 41% of all New York adults

WHY DO WE NEED THE COMMON CORE?

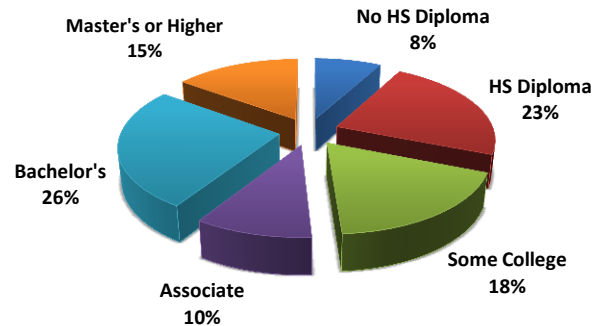

Increasing access to high-quality educational opportunities and supporting pathways to completion are among the most significant challenges facing Latinos in education today.

- Degree attainment among Latino adults in New York is inadequate. On average, **19% of Latino adults have postsecondary degrees**:

Source: 2010-2012 American Community Survey 3-Year Estimates, American Factfinder, US Census Bureau

- **Yet, 69% of New York's jobs in 2020 will require some sort of postsecondary credential:**

CALL TO ACTION

Increasing the educational achievements of Latino children is a national imperative. Internationally benchmarked academic standards will raise the bar for all of our children and present a vital opportunity to improve Latino student outcomes.

We, as a community, need to step up and step in. Elected officials and community and business leaders, together with parents and educators, are critical to securing the success of our children. Let's continue to advocate for and support standards that will improve opportunities for our Latino youth and prepare them for the future. We all have a role to play to ensure that our Latino youth are equipped in the classroom today to handle the jobs of tomorrow.

HOW WILL THE COMMON CORE BENEFIT LATINO STUDENTS?

- The CCSS **help** to ensure that all students, regardless of ZIP code, income, race, or ethnicity, will be taught to and held to the same high standards that are aligned to college and work expectations.
- The CCSS **guarantee** that all students have access to high-quality educational content, supports, and opportunities that research has demonstrated are essential to postsecondary success.
- The CCSS **emphasize** analytical and critical-thinking skills that take learning beyond the classroom, connecting curricula to the real world.
- The CCSS **allow** parents and caregivers to more effectively assess their child's progress and compare their child's education with the education of children in other communities and states.
- **Implementation** of the CCSS requires states to adopt high-quality assessments that can accurately and reliably measure each student's progress.
